

The following Listing of the claims will replace all prior versions and all prior listings of the claims in the present application.

Claims 1-38, 42, 44-73, 75, 76, 80, 82 and 84 are cancelled. New claims 85 through 108 are added.

39. (Currently Amended) An isolated composition comprising at least 30%, [[isolated]] nestin-positive human pancreatic or liver stem cells that [[is]]are not [[a]] neural stem cells.

40. (Currently Amended) The isolated composition of any one of claims 39 and 85 through 94, wherein said [[isolated]] nestin-positive human pancreatic or liver stem cells [[of claim 39, wherein said cell is]] are also GLP-1R-positive.

41. (Currently Amended) An isolated comprising at least 30% [[isolated,]] GLP-1R-positive human pancreatic or liver stem cells that that [[is]] are not [[a]] neural stem cells.

42. (Canceled)

43. (Currently Amended) The isolated composition of any one of claims 39 and 85 through 94, wherein said [[isolated]] stem cells [[of claim 39 or 41 that]] differentiate~~[[s]]~~ to form at least one of: insulin-producing beta cells, glucagon-producing alpha cells; pseudo-islet like aggregates; and hepatocytes.

74. (Currently Amended) A pharmaceutical composition comprising the [[isolated stem cell]] isolated composition of claim 39 [[or]] admixed with a physiologically compatible carrier.

75. (Canceled)

76. (Canceled)

77. (Currently Amended) An [[The]] isolated nestin-positive, GLP-1R-positive or nestin and GLP-1R-positive human pancreatic stem cell [[of claim 39,]] isolated by [[the method of claim 75]];

a) removing a pancreatic islet from a donor;

b) removing cells from said pancreatic islet wherein said islet comprises a plurality of cell types comprising stem cells; and

c) separating said stem cells from said plurality of cells.

78. (Previously Presented) The isolated stem cell of claim 77 that differentiates to form at least one of: insulin-producing beta cells, glucagon-producing alpha cells; pseudo-islet like aggregates; and hepatocytes.
79. (Previously Presented) A pharmaceutical composition comprising the isolated stem cell of claim 77 admixed with a physiologically compatible carrier.
80. (Cancelled)
81. (Currently Amended) The isolated [[stem cell]] composition of claim 41, wherein said stem cells [[that]] differentiate[[s]] to form at least one of: insulin-producing beta cells, glucagon-producing alpha cells; pseudo-islet like aggregates; and hepatocytes.
82. (Canceled)
83. (Currently Amended) A pharmaceutical composition comprising the isolated [[stem cell]] composition of claim 41 admixed with a physiologically compatible carrier.
84. (Canceled)
85. (New) An isolated composition comprising at least 40%, nestin-positive human pancreatic or liver stem cells that are not neural stem cells.
86. (New) An isolated composition comprising at least 50%, nestin-positive human pancreatic or liver stem cells that are not neural stem cells.
87. (New) An isolated composition comprising at least 60%, nestin-positive human pancreatic or liver stem cells that are not neural stem cells.
88. (New) An isolated composition comprising at least 70%, nestin-positive human pancreatic or liver stem cells that are not neural stem cells.
89. (New) An isolated composition comprising at least 80%, nestin-positive human pancreatic or liver stem cells that are not neural stem cells.
90. (New) An isolated composition comprising at least 85%, nestin-positive human pancreatic or liver stem cells that are not neural stem cells.
91. (New) An isolated composition comprising at least 90%, nestin-positive human pancreatic or

liver stem cells that are not neural stem cells.

92. (New) An isolated composition comprising at least 95%, nestin-positive human pancreatic or liver stem cells that are not neural stem cells.

93. (New) An isolated composition comprising at least 98%, nestin-positive human pancreatic or liver stem cells that are not neural stem cells.

94. (New) An isolated composition comprising at least 99%, nestin-positive human pancreatic or liver stem cells that are not neural stem cells.

95. (New) An isolated composition comprising at least 40%, GLP-1R-positive human pancreatic or liver stem cells that are not neural stem cells.

96. (New) An isolated composition comprising at least 50%, GLP-1R-positive human pancreatic or liver stem cells that are not neural stem cells.

97. (New) An isolated composition comprising at least 60%, GLP-1R-positive human pancreatic or liver stem cells that are not neural stem cells.

98. (New) An isolated composition comprising at least 70%, GLP-1R-positive human pancreatic or liver stem cells that are not neural stem cells.

99. (New) An isolated composition comprising at least 80%, GLP-1R-positive human pancreatic or liver stem cells that are not neural stem cells.

100. (New) An isolated composition comprising at least 85%, GLP-1R-positive human pancreatic or liver stem cells that are not neural stem cells.

101. (New) An isolated composition comprising at least 90%, GLP-1R-positive human pancreatic or liver stem cells that are not neural stem cells.

102. (New) An isolated composition comprising at least 95%, GLP-1R-positive human pancreatic or liver stem cells that are not neural stem cells.

103. (New) An isolated composition comprising at least 98%, GLP-1R-positive human pancreatic or liver stem cells that are not neural stem cells.

104. (New) An isolated composition comprising at least 99%, GLP-1R-positive human pancreatic or liver stem cells that are not neural stem cells.

105. (New) An isolated, nestin-positive, GLP-1R positive or nestin and GLP-1R-positive human pancreatic or liver stem cell that is not a neural stem cell, wherein said cell is isolated from a pancreatic islet.

106. (New) The isolated stem cell of claim 105 that differentiates to form at least one of: insulin-producing beta cells, glucagon-producing alpha cells; pseudo-islet like aggregates; and hepatocytes.

107. (New) A pharmaceutical composition comprising the stem cell of claim 105, admixed with a physiologically compatible carrier.

108. (New) A pharmaceutical composition comprising the isolated composition of claim 40, admixed with a physiologically compatible carrier.
